

WAGNER

"The Homeland Of Catfishing"

MAGIC

"The Catfish Origin"

In my thirty as an angler, I have held hundreds of catfishing rods. As with any other thing in life, there were good ones and bad ones. After so many years, I had a clear idea of what I expected from a high-quality catfishing rod. But the road from the original vision to reality tends to be long and strenuous. Unbreakable, practical and made with state-of-the-art technologies and with a beautiful design. Those were the things that I wished to imprint on my rods. However, I would be lying if I said that I knew from the start how to achieve that. It took three years of research and development and trial and error. And mostly error, as it were the errors that helped me move forward the most as they gave me the freedom to experiment. These rods were tested over the entire course of their development by experienced catfish anglers, who also contributed greatly to making the rods what they are today. It was my wish to ensure that whenever somebody used one of my rods, they would never want to use a different rod again. A rod that would be thin, light but incredibly strong. I am convinced we succeeded in our mission.

Yours Jakub Vágner

V-SPIN

MAGIC V-SPIN rods are designed for fishing from a boat, kayak or bellyboat in combination with a classic spinning reel. They can be used for vertical fishing, fishing with catfish clonk, drifting with a float or spinning.

There are three models in the V-SPIN series, the **15, 18 and 23 kg** version. So you can adapt your rod choice to the fishing technique and the size of the catfish at your location.

V-SPIN 15	VMV15S	50 - 200 GR
V-SPIN 18	VMV18S	80 - 300 GR
V-SPIN 23	VMV23S	100-400 GR

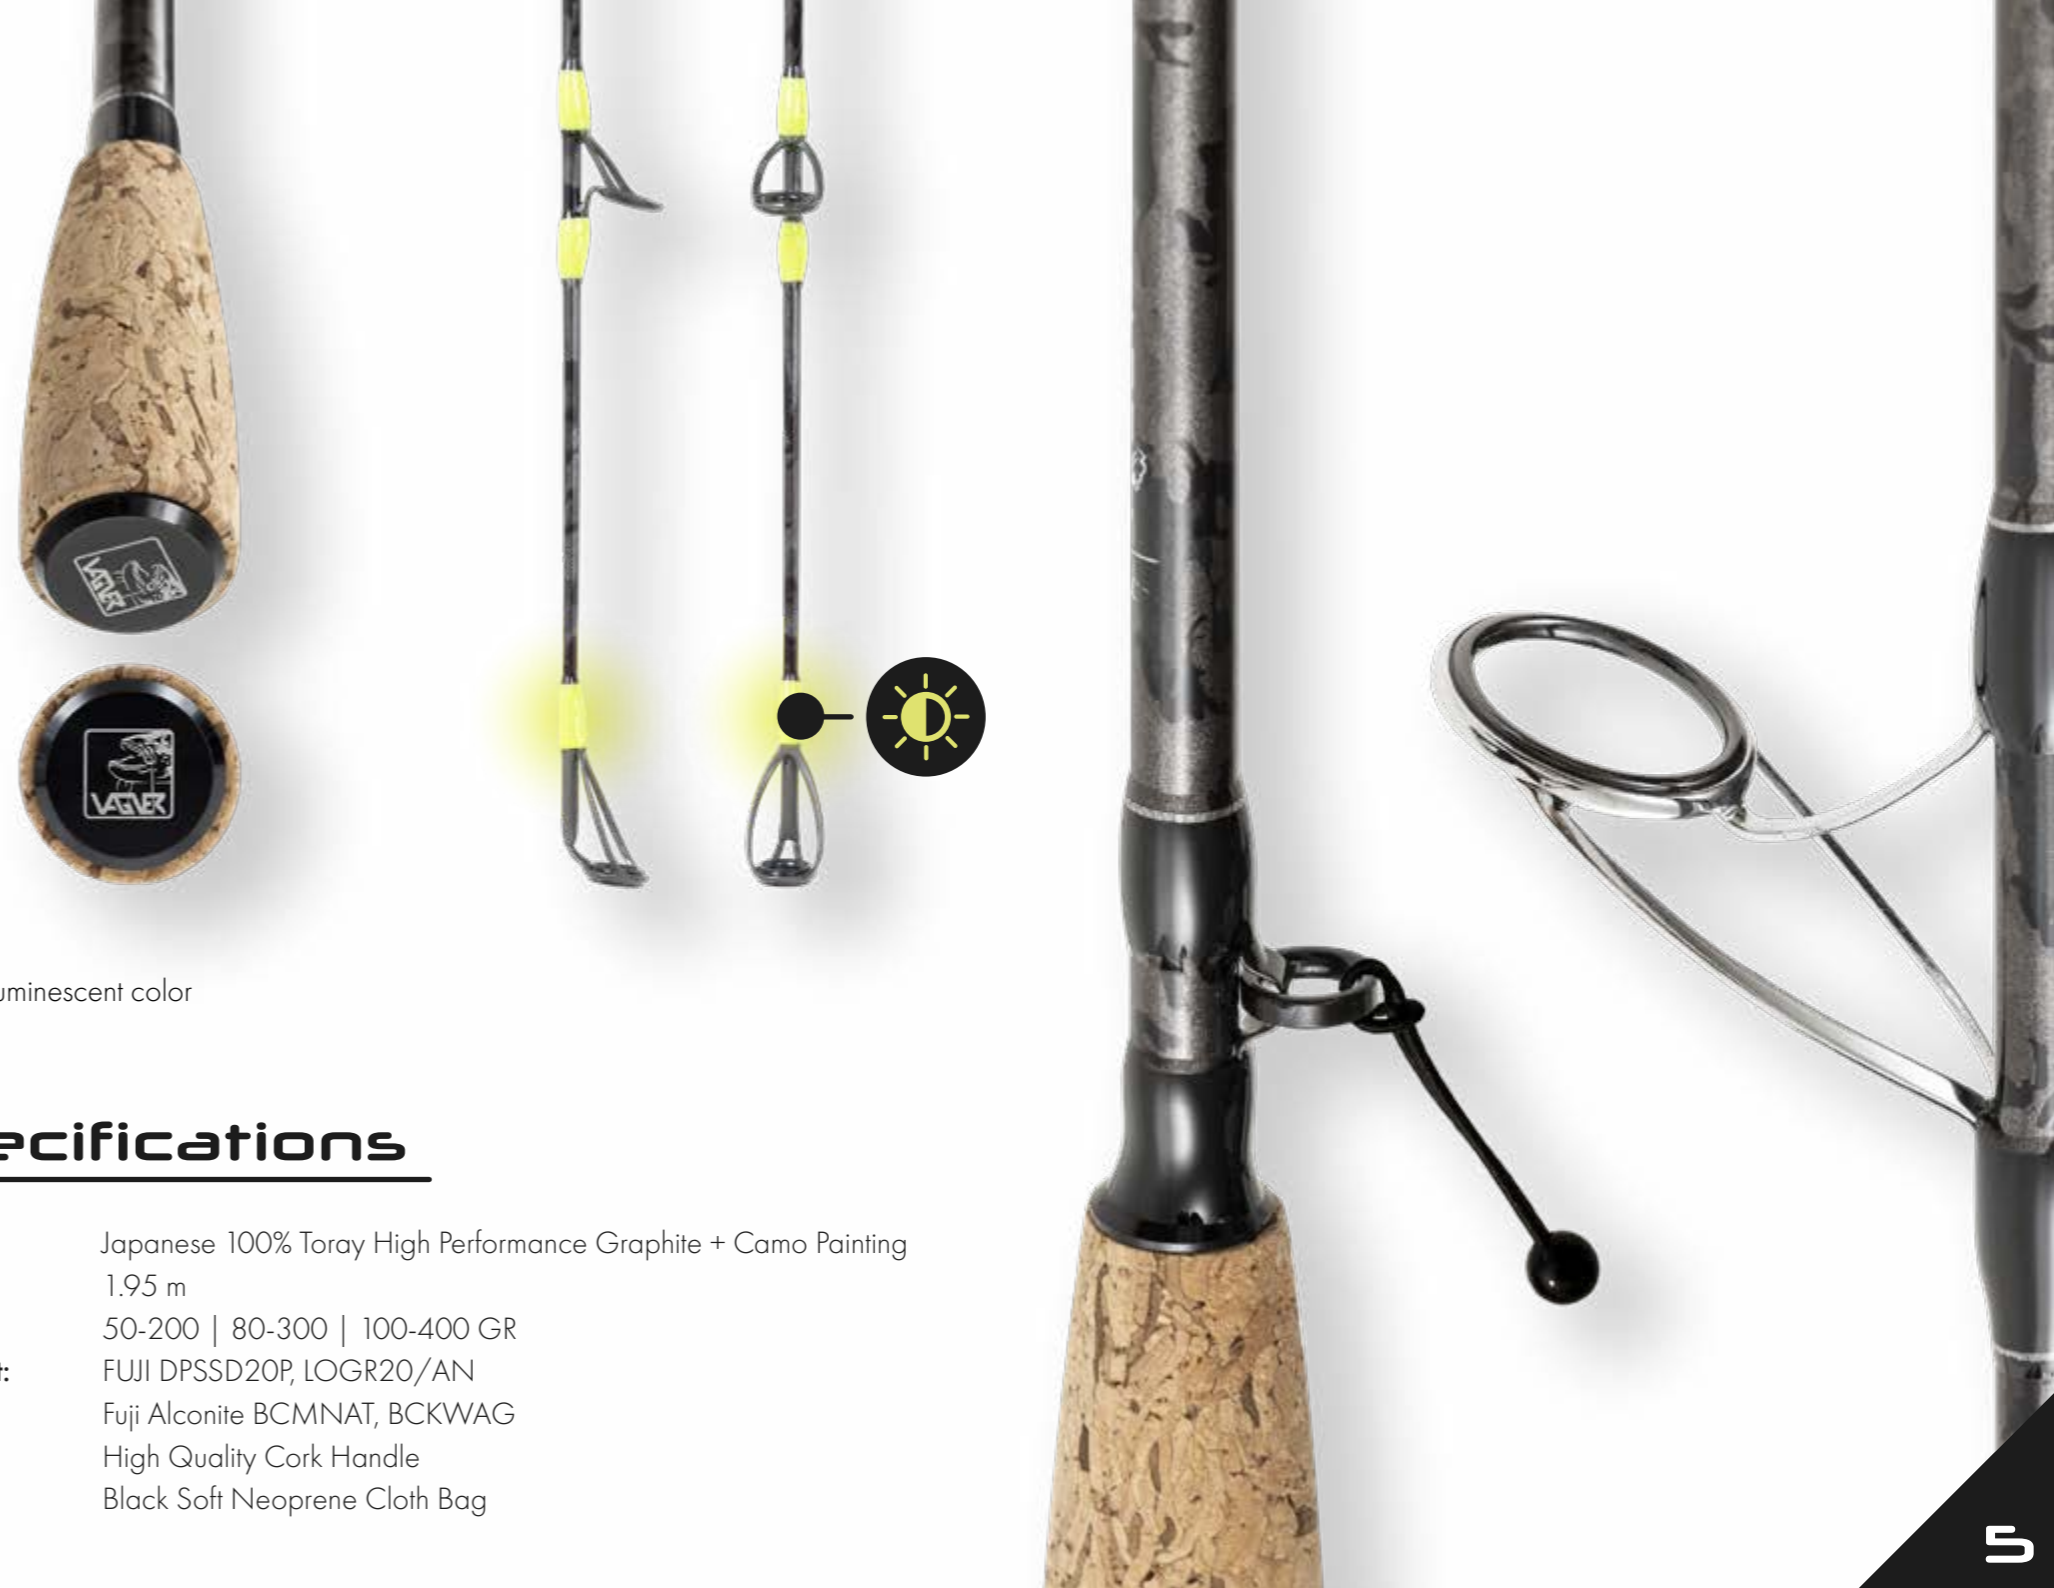

Real Seat:

Specifications

Blank:	Japanese 100% Toray High Performance Graphite + Camo Painting
Length:	1.95 m
Weight:	50-200 80-300 100-400 GR
Reel Seat:	FUJI DPSSD20P, LOGR20/AN
Guides:	Fuji Alconite BCMNAT, BCKWAG
Handle:	High Quality Cork Handle
Packing:	Black Soft Neoprene Cloth Bag

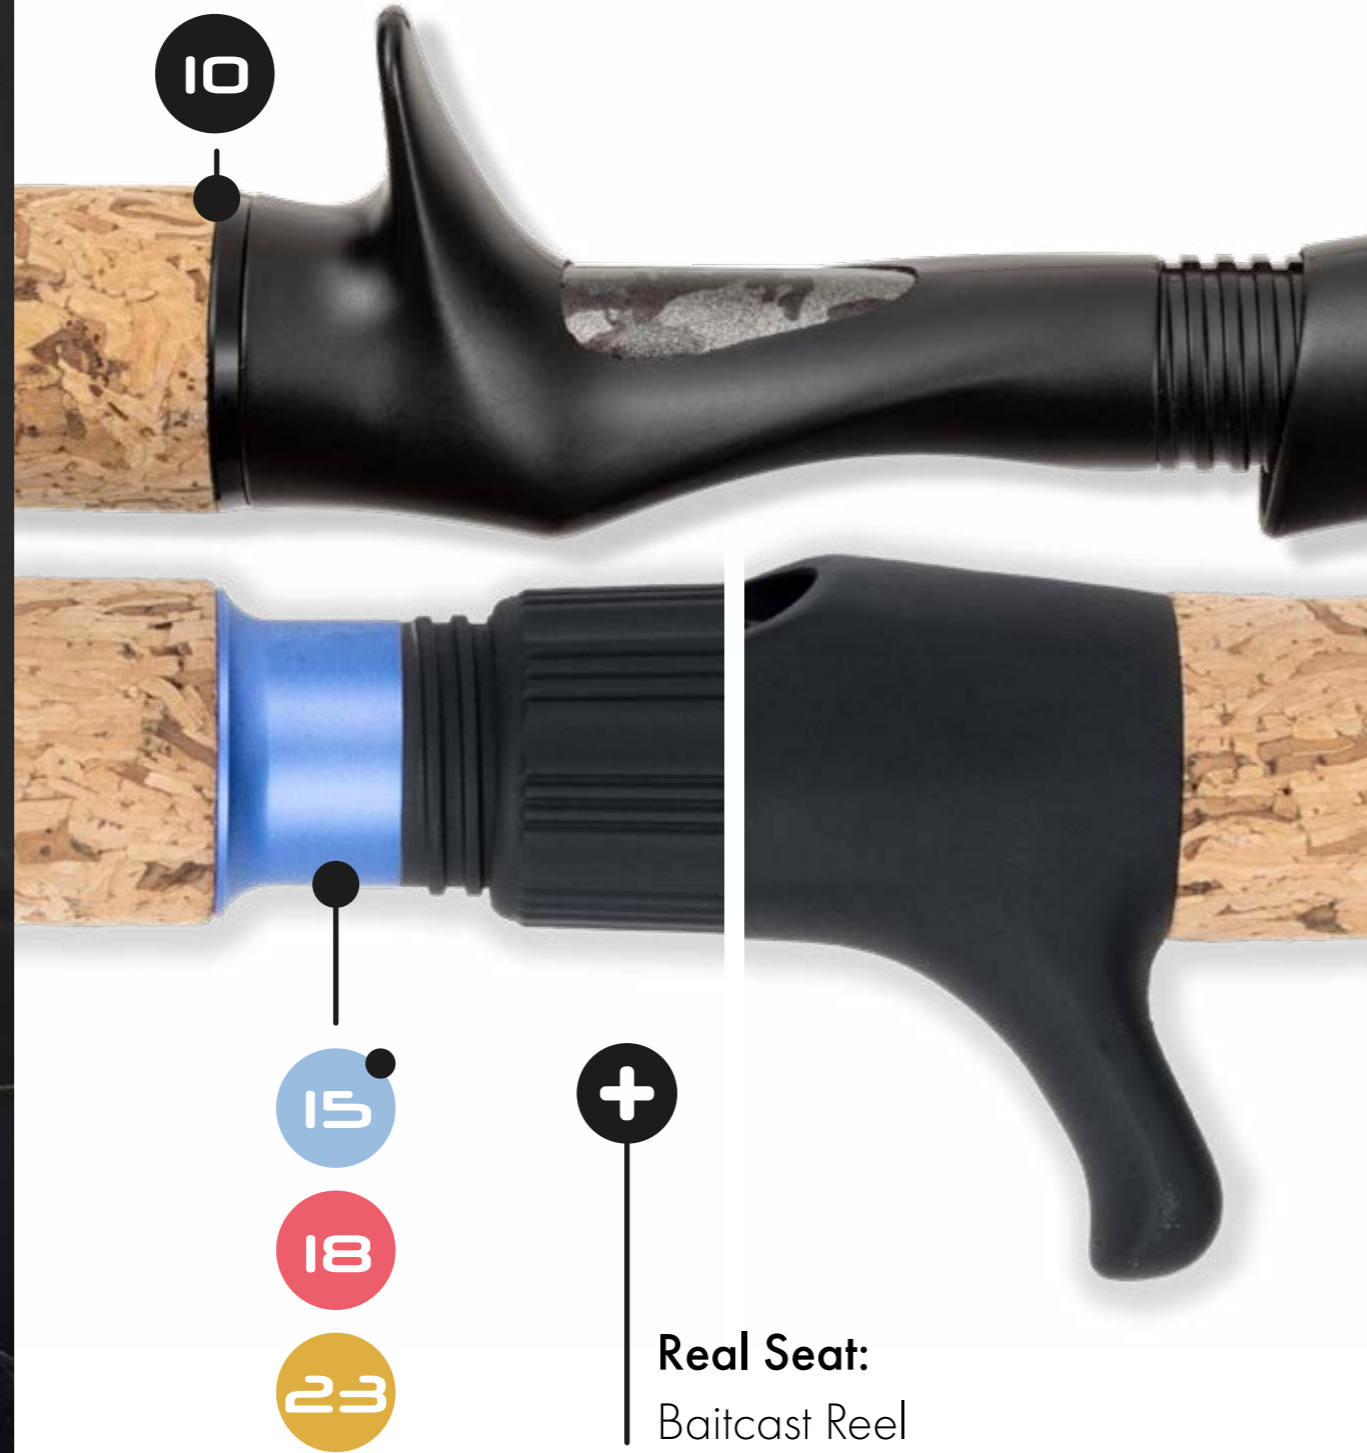

V-BAITCAST

MAGIC V-BAITCAST rods are also designed for fishing from a boat, kayak or bellyboat, but only in combination with a baitcast reel. They can be used for vertical fishing, fishing with catfish clonk and drifting with a float. The 10kg model is designed specifically for spinning.

There are four models in the V-BAITCAST series, the 10, 15, 18 and 23 kg version. So you can adapt your rod choice to your fishing technique, lure/bait size and the size of the catfish at your location.

- V-BAITCAST 10 VMV10B 10 - 80 GR
- V-BAITCAST 15 VMV15B 50 - 250 GR
- V-BAITCAST 18 VMV18B 80 - 300 GR
- V-BAITCAST 23 VMV23B 100 - 400 GR

Reel Seat:	FUJI PSDDL20GM
Guides:	Fuji Alconite BCMNAT, BCKWAG BCLCAG
Handle:	High Quality Cork Handle
Packing:	Black Soft Neoprene Cloth Bag

The **MAGIC IN-LINE** rod was built for catfish anglers who enjoy fishing with a catfish clonk or any other style of vertical catfishing from a boat, kayak or bellyboat. It can be equipped with a classic spinning reel as well as a multiplier reel.

The main advantage of the **MAGIC IN-LINE** rod is line routing through the centre of the blank. There is no possibility of the line getting tangled in one of the guides during fishing. You will appreciate this especially when you hold the line in your hand and when you are striking with your hand.

BANK

BANK VMB28 400 GR

The **MAGIC BANK** is designed for catfish anglers who prefer to fish from the shore or from an anchored boat. It can be equipped with either a classic spinning reel or a multiplier.

MAGIC BANK was built for fishing with buoys, fishing with break lines or subfloats. This rod was built for the toughest conditions and the biggest catfish in Europe.

BAGRUS

On my expeditions, I've learned that there's nothing worse than having a fishing tackle you trust let you down. It has always been my dream to use equipment that I can rely on 100%. I try to develop all products in a way that makes me happy with them myself and makes fishing even more enjoyable. Because then I think the anglers who get their hands on such a product will be happy too.

The **Bagrus reel** is a combination of power and reliability. Everything I have always expected from a catfish reel. I hope it will be a support on your fishing trips and bring you many catches of a lifetime.

The development of these braided lines took two years and involved dozens of experienced catfishers and technological experts in the production of braided lines. All raw material is sourced from Japan (100% super 8 PE fibers). All our lines were developed in Europe. Our goal was to bring to the market lines with high strength, abrasion resistance, but at the same time braided in such a way that they do not create strong vibrations in the water due to current and wind. These vibrations are very well perceived by catfish with the help of the Weber apparatus and create an imaginary underwater wall for catfish, which discourages large and experienced catfish from our baits.

In our „Slime line“ program, you will also find snag leaders and leader materials made of both PE fibres and monofilament.

Made in Europe | Biobased Packaging

	Type	Color		Diameter (mm)	Braided (-)	Load (kg)	Load (lb)	Length (m)

BRAIDED LINE

reflex or camo multicolor | 0.40 mm | 0.50 mm | 0.60 mm

When developing these lines, we tried to apply practical insights gained from our time fishing. That is why the lines come in two color versions. A highly reflective multi-colored lines that is highly visible when stretched over water. This is especially appreciated by catfishermen who fish statically from the shore and need to avoid conflict with swimmers or water sports enthusiasts. This lines also has clearly marked meters. This is an advantage, for example, when fishing with a clonk, when even without the help of sonar you have a clear idea of how deep your bait is. The other type of line is our multi-colored camouflage line, which is designed for fishermen who do not wish to be seen in nature.

We tried to approach the necessary diameters of our braided lines with logic. In both reflective and camouflage versions we offer only three diameters: 0.40 mm, 0.50 mm and 0.60 mm. This will cover all fishing methods currently used for catfish fishing. We will be happy if our lines make your fishing dreams come true.

Color	Diameter (mm)	Braided	Load (kg)	Load (lb)	Length (m)
Reflex or Camo Multicolor	0.40	8x	41.00	90.00	300
Reflex or Camo Multicolor	0.50	8x	52.00	115.00	300
Reflex or Camo Multicolor	0.60	8x	63.00	140.00	300

HOOK LEADER

camo multicolor | 0.80 mm | 1.00 mm | 1.20 mm

With the advent of high-quality fishing lines, braided leader lines have been largely abandoned in recent years. Nevertheless, they belong to the necessary equipment of most catfishers. Braided lines are used for the production of various combined rigs and also in cases where we need maximum strength on a minimum rig length. Fishing lines can be of the highest quality, but they will never reach the maximum load capacity of braided lines.

Our leader lines are made of the highest quality super 8 PE fibers from Japan. They are highly resistant to abrasion and their load capacity is designed for the largest catfish in Europe. These leader lines have also been successfully tested in fishing for other trophy freshwater and saltwater fish. The line is in natural dark camouflage color. You can choose from 0.80 mm, 1.00 mm and 1.20 mm diameters. All diameters are on a 25 meter spool.

Color	Diameter (mm)	Braided	Load (kg)	Load (lb)	Length (m)
Camo Multicolor	0.80	8x	95.00	210.00	25
Camo Multicolor	1.00	8x	120.00	265.00	25
Camo Multicolor	1.20	8x	145.00	320.00	25

SNAG LEADER

orange-white | 1.00 mm

Our snag leader is designed for fishing in extreme conditions, when there is a risk of breaking the thinner main line on rocks, mussels or other obstacles under the water surface. This snag leader has a high abrasion resistance and at a diameter of 1.00mm, it has a load capacity of 120 kilograms. It is made of the highest quality super 8 PE fibers from Japan.

The color of this snag leader is reflective orange, making it highly visible even during night fishing. Meters of distance are marked with white stripes. This snag leader is designed for stationary fishing from the shore or from a boat and is produced in a length of 50 meters.

1m

Color	Diameter (mm)	Braided	Load (kg)	Load (lb)	Length (m)
Orange-White	1.00	8x	120.00	265.00	50

Color	Diameter (mm)	Braided	Load (kg)	Load (lb)	Length (m)
Clear	0.80	-	40.00	88.00	50
Clear	1.00	-	55.00	120.00	50
Clear	1.20	-	70.00	155.00	50

SUPER SOFT MONO LEADER

clear | 0.80 mm | 1.00 mm | 1.20 mm

Mono rigs do not have nearly as high a load capacity as braided lines. They have greater elongation, but compared to lines, they have higher abrasion resistance and, especially in water, they do not cause so many negative vibrations due to current and wind. It could thus be said that mono rigs are quieter in the aquatic environment and harder for catfish to detect. With our Mono rigging material, we have achieved high tensile strength, strong abrasion resistance against rocks and mussels, but at the same time we have managed to keep the mono soft enough. You will appreciate this especially when tying your rigs. You can choose our mono leaders in diameters of 0.80 mm, 1.00 mm and 1.20 mm. All versions are 50 meters long. This will cover all fishing techniques when fishing for catfish.

Clonk

Clonk fishing is one of the "royal" disciplines in catfish fishing. It may be an "ordinary" piece of wood, but it can also be turned into a magic wand that will help us get the fish of our dreams. These clonks are the imprint of all the knowledge that experienced catfish anglers have accumulated over 25 years of practice on the water. They combine two materials. The body of the clonk is made of wood, which gives the lure lightness and also flexibility. The heads of the clonk are made of hardened heart-shaped plastic. This gives the clonk a unique and "unheard" sound/vibration and the hardened plastic makes them resistant to damage to the head against the side of the boat.

At the beginning of this brand, there was no vision of wealth, money, or fame.

It was a huge passion and love for fishing that has driven me forward since I was a child. I tried to live life to the fullest and turn my fishing dreams into reality.

That's how this brand came about. My dream was to develop fishing equipment that would make fishing enthusiasts like me happy. My goal is not to create the biggest catfishing brand.

But I would like to create a brand that will be respected for its innovation, quality and human values. I really want this equipment to make you happy on all your fishing expeditions.
